

CHP CHAMPIONS

The CHP Champions program supports education, physical development and well-being of youth in school programs by supplementing P.E. curriculum with lessons that employ body weight exercises, small-sized tactical themed game play, positive character development and nutritional education. In 12 years, CHP Champions has served over 100,000 youth. Through a community partnership with Capital Health Plan, Titus Sports Academy, World Class Schools, and the School Districts, the program has normalized 9% of these students classified as overweight/obese into normal weight categories.
