

LCS TEACHER/CEO ONE DAY PRACTICUM

This year will be the beginning partnership of 30 Middle and High School teachers and local business leaders to immerse the teachers in fields of potential careers for their students. Teachers will then return to the classroom and inspire their students on future career opportunities. These dynamic teachers will be placed in industries such as healthcare, advanced manufacturing, information technology, leisure and hotel management, government, retail, etc.

The program involves one-on-one work with the teacher and the business leader to expose them to an area of business interest and allow them to take the knowledge and connections that they have learned back to the classroom. These faculty members include school department team leaders as well as future administration leaders at the district level. There will be a session for the teachers and business leaders to gather and share ideas between the attendees. Sponsor businesses can address the audience and provide support materials at the event.
